

# Harmonization of Basic Terminology

- Focus issues:
  - Crucial to harmonize cross-disciplinary terminology to build bridges
  - For example: objects, collections, PIDs, metadata, and the relations among these terms (data organization)
- Approaches:
  - Collect and study best practice communities and generalize from there
  - Refer to use cases and implementations
  - Resulting in a reference terminology in the field of data
- Alignment with RDA?:
  - Produce result in 12-18 months, interim report in March at Gothenburg RDA meeting
